Subject Index for Volume 208

Adhesion
  low temperature bonding process using deposited gold–tin composites, 202
Adsorption
  metal–insulator–semiconductor and metal–insulator–metal devices derived from zirconium phosphonate thin films, 132
  Monte Carlo studies of adsorption. III: Localized monolayers on randomly heterogeneous surfaces, 189
Alloys
  low temperature bonding process using deposited gold–tin composites, 202
  columnar microstructures in magnetron-sputtered refractory metal thin films of tungsten, molybdenum and W–Ti–(N), 181
  study of the thermal behaviour of thin aluminium alloy films, 67
  etching of Ti–W in concentrated H_2O_2 solutions, 237
  fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
  X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161
Aluminium
  study of the thermal behaviour of thin aluminium alloy films, 67
  thermal stability and the failure mechanism of the $Al/W_{76}N_{24}$-/Au metallization, 33
Aluminium nitride
  aluminium and titanium nitride coatings on graphite, prepared by pyrolysis of a polymeric precursor film, 7
Aluminium oxide
  study of stress relaxation in implanted silicon on sapphire structures using Raman spectroscopy, 217
Amorphous materials
  characteristics of deformation localization and limits to the microhardness testing of amorphous and polycrystalline coatings, 223
  hard carbon films deposited under high ion flux, 42
  interface studies of hydrogenated carbon films on amorphous zirconium alloys, 38
  off current characteristics of amorphous silicon thin film transistors under gate-side illumination, 125
Anisotropy
  interaction of surface misfit and monatomic steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. I. Ledges parallel to rectangular surface unit cell faces, 106
  interaction of surface misfit and steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. II. The surface stresses, and the energy of formation of a step, 115
Annealing
  anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
  deposition of high T_c superconductor thin films on silicon substrates by rapid thermal annealing and with a TiN/Ti/Ag buffer layer, 228
  electrical and structural properties of thin films of sputtered $CrSi_2$, 91
  influence of TiAs precipitate formation on morphology degradation of the $TiSi_2$/As-doped polysilicon system, 168
  metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
  study of the thermal behaviour of thin aluminium alloy films, 67
  fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
  thermal stability and the failure mechanism of the $Al/W_{76}N_{24}$-/Au metallization, 33
Anodic oxidation
  anodizing titanium for space applications, 48
Antimony
  growth kinetics of antimony layers deposited on glass and SiO_x in ultrahigh vacuum, 15
Arsenic
  influence of TiAs precipitate formation on morphology degradation of the $TiSi_2$/As-doped polysilicon system, 168
Auger electron spectroscopy
  Auger electron spectroscopy composition depth profiling of Cr/Ni multilayer structures using Ar^+ and Xe^+ ions, 290
  ultrahigh vaccum chemical vapor deposition of rhodium thin films on clean and TiO_2-covered Si(111), 172

Barium
  growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3$/MgO(001) thin films, 76
Bismuth
  oxidizing treatments on bismuth-substituted magnetic garnet films: an X-ray photoelectron study, 260

Carbides
  friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
Carbon
  hard carbon films deposited under high ion flux, 42
  interface studies of hydrogenated carbon films on amorphous zirconium alloys, 38
Chemical vapour deposition
  chemical vapor deposition of tungsten step coverage and thickness uniformity experiments, 177
  ultrahigh vacuum chemical vapor deposition of rhodium thin films on clean and TiO_2-covered Si(111), 172
Chromium
  Auger electron spectroscopy composition depth profiling of Cr/Ni multilayer structures using Ar^+ and Xe^+ ions, 290
  electrical and structural properties of thin films of sputtered $CrSi_2$, 91
Coatings
  aluminium and titanium nitride coatings on graphite, prepared by pyrolysis of a polymeric precursor film, 7
  characteristics of deformation localization and limits to the microhardness testing of amorphous and polycrystalline coatings, 223
  friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
  hard carbon films deposited under high ion flux, 42
  interface studies of hydrogenated carbon films on amorphous zirconium alloys, 38
Computer simulations
  molecular dynamics simulation of the Ni(001) surface, 149
  Monte Carlo studies of adsorption. III: Localized monolayers on randomly heterogeneous surfaces, 189

Contacts
metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
Copper
structural and optical properties of spray-deposited $CuIn(S_{1-x}Se_x)_2$ thin films, 247
X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161

Deposition processes
method of fabricating submicrometer gold wires on optical fibers, 156
deposition of $ZnS_{0.056}Se_{0.944}$ thin films on GaAs(110) substrates: a new chemical growth technique, 243
inter-relationship between deposition temperature and morphology of SnO_2 films deposited by a pyrosol process, 4
influence of boric acid and dissolved oxygen on the morphology of electroless palladium films, 210
Depth profiling
Auger electron spectroscopy composition depth profiling of Cr/Ni multilayer structures using Ar^+ and Xe^+ ions, 290
Dielectric constant
metal–insulator–semiconductor and metal–insulator–metal devices derived from zirconium phosphonate thin films, 132

Electrical properties,
anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
metal–insulator–semiconductor and metal–insulator–metal devices derived from zirconium phosphonate thin films, 132
off current characteristics of amorphous silicon thin film transistors under gate-side illumination, 125
scattering processes in polycrystalline InP films, 100
spontaneous current emission in solution-grown doped polymethylmethacrylate films, 233
Electronic devices
low temperature bonding process using deposited gold–tin composites, 202
method of fabricating submicrometer gold wires on optical fibers, 156
off current characteristics of amorphous silicon thin film transistors under gate-side illumination, 125
Epitaxy
growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3/MgO(001)$ thin films, 76
Etching
etching of Ti–W in concentrated H_2O_2 solutions, 237
Evaporation
growth kinetics of antimony layers deposited on glass and SiO_x in ultrahigh vacuum, 15

Germanium
friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
Gold
low temperature bonding process using deposited gold–tin composites, 202
method of fabricating submicrometer gold wires on optical fibers, 156
anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
capillary instabilities in thin, continuous films, 23
fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
thermal stability and the failure mechanism of the $Al/W_{76}N_{24}/Au$ metallization, 33
Grain boundaries
scattering processes in polycrystalline InP films, 100
study of the thermal behaviour of thin aluminium alloy films, 67
Growth mechanisms
capillary instabilities in thin, continuous films, 23
growth kinetics of antimony layers deposited on glass and SiO_x in ultrahigh vacuum, 15
study of the thermal behaviour of thin aluminium alloy films, 67

Hardness
characteristics of deformation localization and limits to the microhardness testing of amorphous and polycrystalline coatings, 223
hard carbon films deposited under high ion flux, 42
Heat treatment
molecular rearrangement in heat-treated Langmuir–Blodgett films of mixtures of *N*-acyl-*p*-nitroaniline and fatty acid monitored by second-harmonic generation, 62
spontaneous current emission in solution-grown doped polymethylmethacrylate films, 233
High T_c superconductors
deposition of high T_c superconductor thin films on silicon substrates by rapid thermal annealing and with a TiN/Ti/Ag buffer layer, 228

Impurities
ultrahigh vacuum chemical vapor deposition of rhodium thin films on clean and TiO_2-covered Si(111), 172
Indium
anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
structural and optical properties of spray-deposited $CuIn(S_{1-x}Se_x)_2$ thin films, 247
X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161
Indium oxide
temperature dependence of the transmittance, reflectance and absorption of optical films, 96
Indium phosphide
characterization of crystallites at the SiO_2–InP interface, 29
scattering processes in polycrystalline InP films, 100
Infrared spectroscopy
hard carbon films deposited under high ion flux, 42
oriented structures of lead phthalocyanine thin films: IR studies and normal coordinate calculations of the non-planar porphin ring system, 284
Inorganic compounds
oxidizing treatments on bismuth-substituted magnetic garnet films: an X-ray photoelectron study, 260
temperature dependence of the transmittance, reflectance and absorption of optical films, 96
growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3/MgO(001)$ thin films, 76
Interfaces
anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
characterization of crystallites at the SiO_2–InP interface, 29
interface studies of hydrogenated carbon films on amorphous zirconium alloys, 38

metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
study of stress relaxation in implanted silicon on sapphire structures using Raman spectroscopy, 217
Ion plating
X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161

Langmuir–Blodgett films
reflectometric study of the optical properties of Langmuir–Blodgett films, 55
characterization of Langmuir–Blodgett films of 3,4-didecyloxy-2,5-di(4-nitrophenylazomethine)thiophene in a stearic acid matrix, 274
conducting defects in Langmuir–Blodgett films of cadmium stearate, 145
linear and non-linear optical studies of mono- and multilayer Langmuir–Blodgett films of *N*-docosanoyl *para*-nitroaniline, 137
molecular rearrangement in heat-treated Langmuir–Blodgett films of mixtures of *N*-acyl-*p*-nitroaniline and fatty acid monitored by second-harmonic generation, 62
optical properties of Langmuir–Blodgett films prepared from an organic azo compound, 280
surface plasmon polariton studies of highly absorbing Langmuir–Blodgett films, 269
Laser irradiation
film deposition by laser-arcs, 11
third-harmonic generation of thin films of polyaniline, 1
Lattice parameters
interaction of surface misfit and monatomic steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. I. Ledges parallel to rectangular surface unit cell faces, 106

Magnetic structures
oxidizing treatments on bismuth-substituted magnetic garnet films: an X-ray photoelectron study, 260
Metallization
chemical vapor deposition of tungsten step coverage and thickness uniformity experiments, 177
thermal stability and the failure mechanism of the $Al/W_{76}N_{24}$-/Au metallization, 33
Metals
metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
Molecular beam epitaxy
laser molecular beam epitaxy of single-crystal $SrVO_{3-x}$ films, 264
Molybdenum
columnar microstructures in magnetron-sputtered refractory metal thin films of tungsten, molybdenum and W–Ti–(N), 181
Monolayers
characterization of Langmuir–Blodgett films of 3,4-didecyloxy-2,5-di(4-nitrophenylazomethine)thiophene in a stearic acid matrix, 274
Monte Carlo studies of adsorption. III: Localized monolayers on randomly heterogeneous surfaces, 189
Multilayers
reflectometric study of the optical properties of Langmuir–Blodgett films, 55
Auger electron spectroscopy composition depth profiing of Cr/Ni multilayer structures using Ar^+ and Xe^+ ions, 290
columnar microstructures in magnetron-sputtered refractory metal thin films of tungsten, molybdenum and W–Ti–(N), 181
linear and non-linear optical studies of mono- and multilayer Langmuir–Blodgett films of *N*-docosanoyl *para*-nitroaniline, 137

Nickel
Auger electron spectroscopy composition depth profilng of Cr/Ni multilayer structures using Ar^+ and Xe^+ ions, 290
molecular dynamics simulation of the Ni(001) surface, 149
Nitrides
thermal stability and the failure mechanism of the $Al/W_{76}N_{24}$-/Au metallization, 33
Nucleation
capillary instabilities in thin, continuous films, 23
growth kinetics of antimony layers deposited on glass and SiO_x in ultrahigh vacuum, 15

Optical coatings
temperature dependence of the transmittance, reflectance and absorption of optical films, 96
Optical properties
reflectometric study of the optical properties of Langmuir–Blodgett films, 55
anodizing titanium for space applications, 48
characterization of Langmuir–Blodgett films of 3,4-didecyloxy-2,5-di(4-nitrophenylazomethine)thiophene in a stearic acid matrix, 274
optical properties of Langmuir–Blodgett films prepared from an organic azo compound, 280
scattering processes in polycrystalline InP films, 100
structural and optical properties of spray-deposited $CuIn(S_{1-x}Se_x)_2$ thin films, 247
surface plasmon polariton studies of highly absorbing Langmuir–Blodgett films, 269
temperature dependence of the transmittance, reflectance and absorption of optical films, 96
Optical spectroscopy
preparation and characterization of tungsten diselenide thin films, 252
third-harmonic generation of thin films of polyaniline, 1
Organic substrates
metal–insulator–semiconductor and metal–insulator–metal devices derived from zirconium phosphonate thin films, 132
oriented structures of lead phthalocyanine thin films: IR studies and normal coordinate calculations of the non-planar porphin ring system, 284
Oxidation
oxidizing treatments on bismuth-substituted magnetic garnet films: an X-ray photoelectron study, 260

Palladium
influence of boric acid and dissolved oxygen on the morphology of electroless palladium films, 210
Phase transitions
Monte Carlo studies of adsorption. III: localized monolayers on randomly heterogeneous surfaces, 189
Photovoltaics
metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
Physical vapour deposition
anomalous interface resistance of low temperature sputtered Au/In bilayers, 197
deposition of high T_c superconductor thin films on silicon substrates by rapid thermal annealing and with a TiN/Ti/Ag buffer layer, 228
film deposition by laser-arcs, 11

Piezoelectric effect
growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3/MgO(001)$ thin films, 76
Plasma processing
film deposition by laser-arcs, 11
hard carbon films deposited under high ion flux, 42
Polymers
scanning tunnelling microscopy images of polyaniline, 153
spontaneous current emission in solution-grown doped polymethylmethacrylate films, 233
third-harmonic generation of thin films of polyaniline, 1
Pyrolysis
aluminium and titanium nitride coatings on graphite, prepared by pyrolysis of a polymeric precursor film, 7

Reaction kinetics
capillary instabilities in thin, continuous films, 23
Reflection high energy electron diffraction
Laser molecular beam epitaxy of single-crystal $SrVO_{3-x}$ films, 264
Resistivity
electrical and structural properties of thin films of sputtered $CrSi_2$, 91
preparation and characterization of tungsten diselenide thin films, 252
Rhodium
ultrahigh vacuum chemical vapor deposition of rhodium thin films on clean and TiO_2-covered Si(111), 172

Scanning tunnelling microscopy
scanning tunnelling microscopy images of polyaniline, 153
Second-harmonic generation
linear and non-linear optical studies of mono- and multilayer Langmuir–Blodgett films of *N*-docosanoyl *para*-nitroaniline, 137
molecular rearrangement in heat-treated Langmuir–Blodgett films of mixtures of *N*-acyl-*p*-nitroaniline and fatty acid monitored by second-harmonic generation, 62
optical properties of Langmuir–Blodgett films prepared from an organic azo compound, 280
third-harmonic generation of thin films of polyaniline, 1
Secondary electron microscopy
low temperature bonding process using deposited gold-tin composites, 202
Selenides
deposition of $ZnS_{0.056}Se_{0.944}$ thin films on GaAs(110) substrates: a new chemical growth technique, 243
preparation and characterization of tungsten diselenide thin films, 252
structural and optical properties of spray-deposited $CuIn(S_{1-x}Se_x)_2$ thin films, 247
Silicides
electrical and structural properties of thin films of sputtered $CrSi_2$, 91
influence of TiAs precipitate formation on morphology degradation of the $TiSi_2$As-doped polysilicon system, 168
Silicon
friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
metal contacts on amorphous hydrogenated silicon: effects of annealing, 87
off current characteristics of amorphous silicon thin film transistors under gate-side illumination, 125
study of stress relaxation in implanted silicon on sapphire structures using Raman spectroscopy, 217
Silicon dioxide
characterization of crystallites at the SiO_2–InP interface, 29
Silver
fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
Stress
study of stress relaxation in implanted silicon on sapphire structures using Raman spectroscopy, 217
study of the thermal behaviour of thin aluminium alloy films, 67
growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3/MgO(001)$ thin films, 76
Strontium
laser molecular beam epitaxy of single-crystal $SrVO_{3-x}$ films, 264
growth process and certain ferroelectric properties of heteroepitaxial $(Ba_{1-x}Sr_x)TiO_3/MgO(001)$ thin films, 76
Structural properties
electrical and structural properties of thin films of sputtered $CrSi_2$, 91
structural and optical properties of spray-deposited $CuIn(S_{1-x}Se_x)_2$ thin films, 247
Surface energy
interaction of surface misfit and steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. II. The surface stresses, and the energy of formation of a step, 115
Surface morphology
inter-relationship between deposition temperature and morphology of SnO_2 films deposited by a pyrosol process, 4
preparation and characterization of tungsten diselenide thin films, 252
Surface plasmons
characterization of Langmuir–Blodgett films of a 3,4-didecyloxy-2,5-di(4-nitrophenylazomethine)thiophene in a stearic acid matrix, 274
linear and non-linear optical studies of mono- and multilayer Langmuir–Blodgett films of *N*-docosanoyl *para*-nitroaniline, 137
surface plasmon polariton studies of highly absorbing Langmuir–Blodgett films, 269
Surface pressure
conducting defects in Langmuir–Blodgett films of cadmium stearate, 145
Surface stress
interaction of surface misfit and monatomic steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. I. Ledges parallel to rectangular surface unit cell faces, 106
interaction of surface misfit and steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. II. The surface stresses, and the energy of formation of a step, 115
Surface structure
interaction of surface misfit and monatomic steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. I. Ledges parallel to rectangular surface unit cell faces, 106
interaction of surface misfit and steps on unreconstructed {110} surfaces of anisotropic f.c.c. crystals. II. The surface stresses, and the energy of formation of a step, 115
molecular dynamics simulation of the Ni(001) surface, 149

Tin
low temperature bonding process using deposited gold–tin composites, 202
temperature dependence of the transmittance, reflectance and absorption of optical films, 96

Tin oxide
inter-relationship between deposition temperature and morphology of SnO_2 films deposited by a pyrosol process, 4
Titanium
anodizing titanium for space applications, 48
columnar microstructures in magnetron-sputtered refractory metal thin films of tungsten, molybdenum and W–Ti–(N), 181
friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
influence of TiAs precipitate formation on morphology degradation of the $TiSi_2$/As-doped polysilicon system, 168
etching of Ti–W in concentrated H_2O_2 solutions, 237
Titanium nitride
aluminium and titanium nitride coatings on graphite, prepared by pyrolysis of a polymeric precursor film, 7
Transmission electron microscopy
electrical and structural properties of thin films of sputtered $CrSi_2$, 91
influence of TiAs precipitate formation on morphology degradation of the $TiSi_2$/As-doped polysilicon system, 168
fractal character of anneal-induced aggregation in bilayer films of the Ge–Au and Ge–Ag systems, 295
Tribology
friction coefficient of Si–C, Ti–C and Ge–C coatings with excess carbon formed by plasma-assisted chemical vapour deposition, 158
Tungsten
chemical vapor deposition of tungsten step coverage and thickness uniformity experiments, 177
columnar microstructures in magnetron-sputtered refractory metal thin films of tungsten, molybdenum and W–Ti–(N), 181
preparation and characterization of tungsten diselenide thin films, 252
etching of Ti–W in concentrated H_2O_2 solutions, 237
thermal stability and the failure mechanism of the Al/$W_{76}N_{24}$Au metallization, 33

Vacancies
study of stress relaxation in implanted silicon on sapphire structures using Raman spectroscopy, 217
Vanadium oxide
laser molecular beam epitaxy of single-crystal $SrVO_{3-x}$ films, 264

X-ray diffraction
deposition of high T_c superconductor thin films on silicon substrates by rapid thermal annealing and with a TiN/Ti/Ag buffer layer, 228
deposition of $ZnS_{0.056}Se_{0.944}$ thin films on GaAs(110) substrates: a new chemical growth technique, 243
X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161
X-ray photoelectron spectroscopy
interface studies of hydrogenated carbon films on amorphous zirconium alloys, 38
laser molecular beam epitaxy of single-crystal $SrVO_{3-x}$ films, 264
oxidizing treatments on bismuth-substituted magnetic garnet films: an X-ray photoelectron study, 260
preparation and characterization of tungsten diselenide thin films, 252
X-ray photoelectron spectroscopy and structure of Cu–In alloy films, 161

Zinc
deposition of $ZnS_{0.056}Se_{0.944}$ thin films on GaAs(110) substrates: a new chemical growth technique, 243
Zirconium
metal–insulator–semiconductor and metal–insulator–metal devices derived from zirconium phosphonate thin films, 132
